

REDEFINED

New Protocol. New Plate. New Packages.

Award-winning, dual cartridge designed ELITE battery is now power-compatible with the RED ONE™ camera system. More choices from one smart battery—use it in standard configuration for a wide variety of high-end cameras or switch to SB Mode for RED ONE™ battery capacity protocol.

Make the direct connect from the ELITE to the RED ONE™ with the custom-crafted mounting plate EL-BAPIDXA—combining the precision of V-Mount technology integrated with a sleek Lemo interface. Includes two-pin D-Tap power source supplying up to 50W for ancillary gear.

Two high quality power system packages featuring either our quad or dual charger. And because the 136Wh ELITE's cartridges can be disengaged, it's shippable with full compliance for air, cargo and ground transportation.

REDEFINED.....for more possibilities.
